Applicant's undersigned representative has authority to submit this paper and all other papers in connection with this and all other applications pursuant to a Revocation and Power of Attorney form, signed by applicant on June 18, 2001 and attached hereto as

09/21/2001 LGIPBGS 00000011 09013092

Applicant filed U.S. Patent Application Serial No. 09/150,632 (the '632 application) on September 9, 1998. The '632 application was filed with 15 claims. Claims 12-15 were withdrawn from consideration as a result of a restriction requirement. The application was allowed on January 7, 2000, and applicant paid the issue fee on April 7, 2000. The application matured into U.S. Patent No. 6,062,092 on May 16, 2000.

On April 6, 2000, applicant filed a paper purporting to be a Continued Prosecution Application (CPA) request transmittal (the "CPA Transmittal"). The CPA Transmittal was accompanied by a preliminary amendment canceling claims 1-11 and amending claim 12. The USPTO's copy of the CPA Transmittal bears a date stamp of April 6, 2000. A postcard receipt, filed with the CPA Transmittal, also bears a date stamp of April 6, 2000. A copy of the USPTO's copy of the CPA Transmittal, the accompanying amendment, and the postcard receipt are collectively attached as Appendix B.

Applicant now realizes that the papers filed on April 6, 2000 should have been filed under 37 CFR §1.53(b) as opposed to 37 CFR §1.53(d). Specifically, applicant did not intend the '632 application to become abandoned and, instead, intended the '632 application and the divisional application to proceed on parallel tracks. Applicant therefore petitions to disregard that portion of the previously filed request for CPA that constitutes an inherent request to expressly abandon the '632 application and to treat that paper as the filing of an application under 37 CFR §1.53(b). This petition is believed to be timely because, while the USPTO acknowledged receipt of the CPA Transmittal, there is no record that the CPA papers were properly processed or entered into the file. Indeed, the issuance of the '092 patent from the '632 application proves that the CPA application has not been fully processed. Grant of this petition is therefore believed to be in order.

See, e.g., MPEP §201.06(d).

A check in the amount \$130 in payment of the petition fee under 37 CFR 1.17(h) is enclosed. No additional fees are believed to be payable with this communication. Nevertheless, should the Examiner consider any additional fees to be payable in conjunction with this or any future communication, the Director is authorized to direct payment of such fees, or credit any overpayment to Deposit Account No. 50-1170.

In view of the foregoing, grant of this Petition, assignment of a serial number to the divisional application filed April 6, 2000, and processing of that application are believed to be in order and are respectfully requested. Should there be any remaining questions the attending to of which would expedite such action, the Petitions Examiner is requested to contact the undersigned at the telephone number appearing below.

Respectfully submitted,

Timothy E. Newholm
